We are letting you know that the four RGF systems, one was donated and three were purchased from your company worked very well and beyond our expectation. Two of the wall mounted plug-ins were installed in the front offices. We had complaints of odor and air quality (ink from papers and copy machines, air pollutant) before the installation of these units.

The third unit, a 15 ton Guardian Air, was installed in our supply duct circulation system and we have definitely noticed a cleaner and fresher smell in our men's and women's locker rooms than last year. The fourth unit, also a 15/20 ton Guardian Air, was donated and installed free in our pool dehumidification system which is a humid and chlorine environment and has also greatly reduced the chlorine and odor smell.

Honorary Directors
Michele Bank
Sam Goldstein
Rabbi Jacob Greenberg
Powel F. Wartel

Since the UV systems were installed, an improvement in the air quality is noted and hopefully it will prevent any airborne issues especially in the coming winter months when the flu season is at its peak. We are very pleased with the units installed and will continue to monitor and see how effective they are. We hope to purchase more of these units for our facility in the near future.

Marc W. Arje LMSW
Executive Director

Moshit Rivkin
Assistant Director

Sincerely,

Rick Singh
